

FlowMax™ 6" Regulator Flanged CL 150

The **Mooney™** FlowMax 6" Single Port regulator is an economical and easy-to-maintain pilot loading type regulator specifically designed for high capacity even at low differential pressures. It is designed to be used in conjunction with a self-contained pilot control system as pictured to provide exceptional pressure control.

Overpressure Protection

The Mooney FlowMax regulator has a full ASME rating of 250 psi (17 bar) on both the inlet and outlet connections as well as the actuator housing assembly. Overpressure protection is required only if the pressure can exceed the flange or body rating.

FlowMax 6" Low Differential Regulator with Series 20 Pilot and Type 30 Filter

The pilots, like most regulators, may have an outlet pressure rating lower than the inlet pressure rating. If this is the case, then some external form of overpressure protection must be provided for the pilot.

Anytime the FlowMax regulator or pilot system is exposed to pressures in excess of its rating it should be inspected for damage.
